What is Nuri?

Nuri is an AI-powered tutor that makes learning feel like an adventure. Powered by advanced AI, Nuri adapts to each child's learning style, pace, and emotional state — becoming smarter and more personalized with every session. Nuri covers the Cambridge Primary and Egyptian National curriculum for Years 1–6 across 7 subjects.

 7 Subjects Maths, Science, English, History, Arabic, Religion, Social Studies	 Years 1–6 Cambridge Primary & Egyptian National curriculum	 227 Topics Detailed learning objectives tracked at individual level
 40 Badges 5 rarity tiers from Common to Legendary	 AI-Powered Adapts to learning style, pace & emotional state	 Any Device Phone, tablet, laptop — PWA feels like a native app

Core Learning Features

★ Learn Mode

- Conversational AI teaching — Nuri chats, not lectures
- Auto-suggests next unmastered topic or objective
- Voice reads aloud at kid-friendly speed (sentence by sentence)
- Quick action buttons: **Explain Simpler**, **Give Example**, **Quiz Me**, **I Can Teach This**

◆ Quiz Mode

- 4 difficulty levels: **Easy**, **Medium**, **Hard**, **Challenge Me**
- XP scales with difficulty: 5 (Easy) to 20 (Challenge Me) per correct answer
- Varied question formats: word problems, patterns, comparisons, scenarios, fill-in-blank
- Confidence Meter: “How sure were you?” — tracks blind spots over time
- Never repeats questions within a session

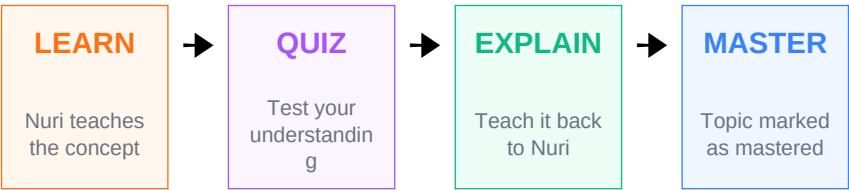

▲ Explain It Back

- Child becomes the teacher — explains a topic to Nuri
- Nuri plays confused, asks probing questions to deepen understanding
- AI scores understanding 1–5 with detailed feedback

■ Homework Helper

- 4 input methods: **camera snap**, **upload photo**, **upload PDF**, **type question**
- AI Vision extracts individual questions from homework images
- Socratic guided solving — Nuri never gives the answer, guides discovery
- “Write your answer on paper and show me!” verification every 4 questions
- Curriculum-aware: uses only methods the child has been taught at their year level

How Learning Modes Work Together

Homework Helper — Input Methods

●	Camera Snap	Take a photo of the worksheet page. AI Vision detects and extracts each question automatically.
●	Upload Photo	Upload an existing photo from your device. Same AI extraction as camera snap.
●	Upload PDF	Upload a PDF worksheet. Each page is processed for question extraction.
●	Type Question	Type or paste the question directly. Great for quick single questions.

Curriculum Coverage

Cambridge Primary (4 subjects)

■ Maths	Number, Geometry, Measurement, Data Handling (Years 1–6)
▲ Science	Biology, Chemistry, Physics (Years 1–6)
◆ English	Reading, Writing, Grammar, Spelling (Years 1–6)
★ History	Chronology, Events, Sources (Years 1–6)

Egyptian National (2 subjects)

● Arabic Language	Reading, Writing, Grammar, Vocabulary (Years 1–6)
† Christian Religious Education	Coptic Orthodox tradition (Years 1–6)

Additional Subject

♥ Social Studies	Geography, Civics, Community (Years 1–6)
------------------	--

Each subject has detailed topics with specific learning objectives tracked at the individual objective level. Nuri does not just track “Fractions” — it tracks “can add fractions with the same denominator” vs “can compare fractions with different denominators.”

AI Intelligence — How Nuri Gets Smarter

★ Child Intelligence Profile

Every AI interaction is informed by everything Nuri knows about the child:

- **Strengths:** “Great at multiplication — can move faster”
- **Learning style:** visual, analogies, examples, auditory, try-first
- **Mistake patterns:** calculation errors, conceptual gaps
- **Neglected subjects:** “History not practiced in 10 days”
- **Struggles:** “Fractions at 35% accuracy — extra patience needed”
- **Confidence calibration:** blind spots (confident but wrong)
- **Session memory:** “Last time we worked on the water cycle”
- **Prerequisite awareness:** “Checking if multiplication is solid”

♥ Emotional Detection

●	Frustration	3+ wrong answers	<i>“Let’s try a different approach”</i>
●	Boredom	Instant answers	<i>Asks for reasoning explanation</i>
●	Confusion	“idk” responses	<i>Simplifies with bigger hints</i>
●	Excitement	High energy	<i>Matches the child’s energy</i>

◆ Cross-Subject Connections

- “In Arabic, the word for fraction is *kasr*!”
- “The water cycle is why the Nile floods — that’s History!”

Learning Support — Neurodivergent Adaptations

Nuri recognizes and adapts to different learning needs. Parents can enable modes from the Parent Dashboard, and Nuri also detects patterns over time, gently suggesting adaptations to parents.

■ Dyslexia Mode

- All text read aloud automatically
- Shorter messages, simpler words
- Never penalizes spelling mistakes
- Voice answers encouraged over typing
- Letter-swapped answers marked correct if concept is right

★ ADHD Mode

- Micro-sessions (5 min max before suggesting a switch)
- Rewards every 2 questions
- High energy, constant variety
- Re-engages after 20 seconds of silence
- Speed rounds to channel energy

◆ Autism Mode

- Predictable session structure (always same flow)
- Literal, clear language — no sarcasm or idioms
- Previews transitions: “In 2 more questions, we’ll switch”
- Celebrates pattern recognition and factual strengths
- Consistent Nuri personality (no sudden changes)

▲ Dyscalculia Mode

- No timed maths questions ever
- Visual representations for every number concept
- Separates understanding from calculation
- Allows finger counting — never shames it
- Extra hints before showing answers

-
1. Parents can enable modes from the Parent Dashboard
 2. Nuri also detects patterns over time and gently suggests to parents
 3. Specialist export: real behavioral data for professional assessment

Gamification

★ XP & Levels

Growth-only scoring — XP **never decreases**. This is the core anti-IXL philosophy. Children always feel forward progress, never punishment for mistakes.

◆ 40 Badges Across 8 Categories

Milestones Quiz count, levels	Quizzes Perfect scores, streaks	Streaks 3, 7, 14, 30, 100 days	Learning Sessions, Explain It Back
Mastery 5-star topics per subject	Subjects Diversity, all-subjects	Fun Night owl, early bird	Daily Challenge completions

5 Rarity Tiers

● Common	● Uncommon	● Rare	● Epic	● Legendary
----------	------------	--------	--------	-------------

■ **Daily Mystery Challenge** — Sealed envelope appears daily. Complete for +50 XP. Adds daily motivation.

★ **Nuri Evolution** — 6 visual stages as the child levels up. Nuri grows and changes appearance.

◆ **Sticker Book** — Visual collection of earned badges. Rarity borders match the tier. Encourages collecting.

Social Features

★ Study Duels

Challenge a friend or sibling to a knowledge duel! Study Duels make revision social and competitive while ensuring everyone earns XP — winning is a bonus, not a requirement.

1	Create	Pick a subject and create a 5-question challenge
2	Share	Get a 6-character code to share with a friend
3	Compete	Both answer the same questions with a timer
4	Compare	Side-by-side results — Winner +50 XP, everyone +20 XP

◆ Profile Switcher

Multiple children can use the same device, each with their own profile:

- Each child has their own profile, data, and Nuri relationship
- Device-scoped: visitors can't see other people's profiles
- Switch profiles easily from the home screen
- Separate XP, badges, progress, and learning history per child

Adventure Mode

Story Mode — "The 7 Lost Books of Knowledge"

An epic adventure where each chapter is linked to a subject. Children recover ancient books of knowledge, solving academic challenges along the way.

■	The Book of Numbers	Maths	<i>Hidden in a pyramid</i>
▲	The Book of Nature	Science	<i>Lost in a magical jungle</i>
◆	The Book of Words	English	<i>Trapped in an infinite library</i>
★	The Book of Time	History	<i>Stuck in the past</i>
●	The Book of Letters	Arabic	<i>Guarded by a sphinx</i>
†	The Book of Light	Religion	<i>In an ancient monastery</i>
♥	The Book of People	Social Studies	<i>In a world city</i>

Each chapter flow: Story Intro → Learn → Challenge (3 questions) → Boss Puzzle → Reward

★ Nuri's World (Virtual Treehouse)

A virtual treehouse that the child decorates with unlockable items. 21 items across 4 categories, earned through different achievements:

- | | |
|--|--|
| • Furniture — Unlocked by reaching levels | • Decorations — Unlocked by earning badges |
| • Accessories — Unlocked by maintaining streaks | • Special — Unlocked by completing homework |

Parent Dashboard

Access: Profile → Parent Dashboard → 4-digit PIN

▲ What Parents See

- Weekly XP chart and active days
- Per-subject accuracy progress bars
- AI-generated session reports (strengths, struggles, recommendations)
- Test predictions from homework patterns
- Common mistake patterns
- Recent badges earned

◆ Parent Controls

Notes for Nuri:	"Focus on fractions this week" (normal / high / urgent priority)
Learning needs toggles:	Dyslexia, ADHD, Autism, Dyscalculia modes
AI behavioral observations:	Evidence-based insights with supporting data
Specialist report export:	Professional-grade data for assessment specialists

Test Preparation

✓ Pre-Test Predictor

When a child knows a test is coming, Nuri creates a personalized study plan:

1	Child taps "I have a test!" on any subject page
2	Picks topics and test date
3	AI generates a countdown study plan
4	Daily tasks appear on homepage: "Day 2 of 4: Practice fractions"

★ Automatic Test Detection

When the same topic appears **3+ times in homework within 2 weeks**, Nuri proactively alerts:

"Your teacher seems to be focusing on [topic]. A test might be coming!"

Smart Learning Engine

● Spaced Repetition

Review queue with memory scores. Items resurface at optimal intervals based on forgetting curves. Each concept has a memory strength score that decays over time, ensuring children review material just before they would forget it.

■ Mistake Journal

Auto-logs every wrong answer. Children can filter by subject, mark items as resolved, and practice specific mistakes again. The journal is automatically included in test preparation plans.

◆ Adaptive Topic Selection

Quiz mode automatically picks the weakest topics. Learn mode suggests the next unmastered objective. The system never lets a child get stuck on content that is too hard or too easy.

▲ Objective-Level Tracking

Not just "Fractions" but "can add fractions with same denominator" vs "can't compare fractions with different denominators." Granular tracking enables precise remediation.

★ Prerequisite Chains

If fractions are weak, Nuri checks if multiplication is solid first. The system understands which concepts depend on which, ensuring foundations are strong before advancing.

Voice & Accessibility

★ Voice Features

- Text-to-speech at kid-friendly speed (0.82x English, 0.75x Arabic)
- Sentence-by-sentence streaming (speaks as text appears)
- Arabic voice for Arabic-majority text, English for mixed content
- Fill-in-blank gaps spoken as “blank”
- Speech recognition for voice answers

◆ Device Compatibility

- Works on any device — phone, tablet, laptop
- PWA: “Add to Home Screen” feels like a native app
- Responsive design adapts to any screen size

✓ Reliability & Error Handling

- Offline fallback: friendly “Nuri is sleeping” page with cute animation
- Error recovery: “Oops! Nuri tripped!” — never a white screen
- Session persistence: survives accidental back button presses
- Auto-save: no work is ever lost mid-session

Getting Started

★ For Kids

1	Open nuri-beryl.vercel.app on any device
2	Tap “Create New Profile”
3	Enter your name, pick your year group (1–6), choose a color
4	Start exploring! Try Learn mode first to meet Nuri

◆ For Parents

1	Create your child’s profile
---	-----------------------------

2	Go to Profile → Parent Dashboard
3	Set a 4-digit PIN (so kids can't access parent area)
4	Add notes for Nuri: what to focus on, any learning needs
5	Check back weekly for progress reports and AI insights

✓ **Tips for Best Results**

- ✓ Let children explore freely at first — Nuri adapts to them
- ✓ Check the Parent Dashboard weekly for AI insights
- ✓ Use “I have a test!” before school tests for personalized study plans
- ✓ Homework Helper works best with clear, well-lit photos of worksheet pages
- ✓ Short daily sessions (10–15 minutes) are more effective than long weekly ones
