5-11

Target
Age

Nuri is a conversational AI tutor designed for children aged 5–11. It combines adaptive learning, rich gamification, and a warm owl persona to make studying feel like an adventure. This document outlines the complete feature set available to students and parents.

1 Core Learning

Learn Mode

Streaming AI chat with Nuri — conversational teaching, not lectures. Auto-suggests the next unmastered topic. Voice reads aloud sentence-by-sentence.

Quiz Mode

4 difficulty levels (Easy / Medium / Hard / Challenge Me). XP scales 5–20 per correct answer. Varied formats: word problems, patterns, comparisons, scenarios. Confidence meter after each answer.

Explain It Back

Child teaches Nuri. AI plays confused and probes understanding. Performance scored 1–5 stars for a genuine mastery check.

Homework Helper

Snap a photo, upload an image or PDF, or type the question. AI extracts tasks and guides Socratic solving. Child writes the answer on paper, then snaps it for AI verification.

2 Curriculum

Science

English

History

Arabic

Religion

Social Studies

- Years 1–6: Cambridge Primary + Egyptian National curriculum
- 227 topics with thousands of granular learning objectives
- Objective-level mastery tracking per child
- Cross-subject connections: Nuri links topics across subjects intelligently

3 AI Intelligence

Child Intelligence Profile

AI learns each child's struggles, strengths, learning style, confidence patterns, and mistake history across all modes.

Session Memory

Nuri remembers previous sessions: 'Last time we were working on fractions — shall we continue?'

Emotional Detection

Detects frustration, boredom, and confusion in real time. Adapts tone, pace, and challenge level accordingly.

Learning Style Detection

Tracks visual, analogy, example-based, auditory, and try-first preferences. Teaches to the child's style.

Prerequisite Awareness

If a child struggles with fractions, Nuri checks if multiplication is solid first before advancing.

Parent Notes

Parents can direct Nuri's focus — their instructions override the AI's own curriculum assessment.

4 Gamification

XP & Levels

Growth-only scoring — XP never decreases. Every session builds momentum. Anti-IXL philosophy: effort and courage are always rewarded.

40 Badges

Across 8 categories and 5 rarity tiers. Sticker Book visual collection with rarity borders (Common → Legendary).

Daily Mystery Challenge

Envelope animation reveals a surprise challenge each day. Completing it earns +50 XP.

Streaks & Milestones

Streak counter with special celebrations at 7, 14, 30, and 100 consecutive study days.

Nuri Evolution

6 visual evolution stages for the Nuri owl character, unlocked by reaching level thresholds.

Level-Up Celebrations

Confetti animations and personalised congratulations when a child reaches a new level.

5 Social & Competition

Study Duels

Create or join 5-question head-to-head battles with a shareable code. Live timer, real-time scoring, side-by-side results screen. Everyone earns XP regardless of outcome.

Profile Switcher

Multiple children can use the same device. Each sibling maintains a separate profile, XP history, badges, and learning data.

6 Adventure Mode

Story Mode — The 7 Lost Books of Knowledge

7 narrative chapters, one per subject, each with 5 stages: story intro, learn, challenge, boss puzzle, and subject reward. Learning embedded in epic storytelling.

Nuri's World

A virtual treehouse with 21 unlockable items earned through study milestones. Children personalise their space as they learn.

7 Parent Dashboard

Secure PIN Access

Parent dashboard is PIN-protected, keeping the child-facing UI clean and distraction-free.

Weekly Stats

Total XP earned, active study days, session count, and time-on-task at a glance.

Subject Accuracy Bars

Visual per-subject accuracy bars reveal strengths and gaps across the full curriculum.

AI Session Reports

Automatically generated after each session: highlights, struggles, and personalised recommendations.

Test Predictions

Homework topic tracking identifies upcoming tests and surfaces them on the dashboard.

Mistake Patterns

Recurring wrong answers are surfaced so parents (and Nuri) can address root misconceptions.

8 Test Preparation

Pre-Test Predictor

Tap 'I have a test!' and set the date. Nuri builds a personalised countdown study plan covering the most important topics in the right order.

Daily Plan Cards

Homepage shows today's recommended tasks based on spaced repetition and upcoming test dates.

Homework Topic Tracking

Nuri notes every homework topic to predict which subjects are likely to appear in the next test.

9 Smart Learning Engine

Spaced Repetition

Review queue with memory scores. Topics resurface at scientifically optimal intervals.

Mistake Journal

Every wrong answer is auto-logged. Filter by subject, review explanations, practice again.

Difficulty Scaling

Questions shift difficulty based on real-time mastery data, including year-shifted challenge questions.

Confidence Meter

Tracks blind spots (lucky guesses) and genuine mastery. Ensures solid understanding, not pattern matching.

Adaptive Topic Selection

Nuri continuously selects the next topic based on mastery data, gaps, and curriculum sequence.

10 Voice & Accessibility

Text-to-Speech

Nuri reads all content aloud at a child-friendly pace. Essential for Years 1–2 readers.

Speech Recognition

Microphone button lets children answer questions by speaking. Particularly useful for maths and Arabic.

Cross-Device Support

Fully responsive — works on any phone, tablet, or laptop without installing an app.

Add to Home Screen (PWA)

Progressive Web App support gives a native app feel with one-tap access from the home screen.

Offline-Friendly

Graceful fallback for low-connectivity environments. Core learning content remains accessible.

Session Persistence

Sessions survive accidental back navigation. No progress is lost mid-lesson.

Ready to learn?

Nuri is available on the web, as a home screen app, and on any device.

Sign up at **nuri.app** and start your first session today.
